DETAILED ACTION

Response to Amendment

1. This Office Action is in response to the amendment filed on 01/19/06. Claims 1-4 are pending. Currently no claims are in condition for allowance.

Claim Rejections - 35 USC § 102

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Kazmi et al. (US 2002/0159416).

Regarding claim 1, Kazmi discloses a method for frequency and channel assignment for sectors in a spread spectrum communications system, the method comprising:

modulating a message on a first synchronization channel transmitted on at least one first frequency from at least one sector (it is inherent to modulate a data [for example: adjusting its power; transposing at the correct burst frequency etc.] Fig. 1 shows: a communication path includes a radio link formed between a base station 12 and the appropriate mobile station 14 [14a is constructed to be operable pursuant to IS-95 standard; and 14b is constructed to operable pursuant to IS-2000 standard]. Each radio link 26 includes a forward CDMA channel 27 and a reverse CDMA channel 28; as is known in the art that a forward link and a reverse link are allocated separate frequencies);

modifying the message to generate a single modified message beginning with a Protocol Revision (P REV) field and ending with an Extended CDMA frequency Assignment (EXT CDMA FREQ) field (TYPE II message 400 includes P_REV 330 and EXT_CDMA_FREQ206; see figs. 4, 5 and 6; TYPE II sync paragraph 0039-0042);

Art Unit: 2662

modulating the modified message on a second synchronization channel transmitted on at lease one second frequency form the at least one sector (0037-0039).

Regarding claim 2, Kazmi discloses the method wherein the modulating a message on a first synchronization channel transmitted on at least one first frequency from the at least one sector comprises: modulating a Sync channel Message on a first synchronization channel transmitted on at least one first frequency from the at lest one sector (0037).

Regarding claim 3, Kazmi discloses the method wherein the modulating a modified message on a second synchronization channel transmitted on at least one second frequency from the at least one sector comprises: modulating the modified Sync Channel Message on a second synchronization channel transmitted on at least one second frequency from the at least one sector (0039).

Regarding claim 4, Kazmi discloses the method wherein the modulating the modified message on a second synchronization channel transmitted on at least one second frequency from the at least one sector comprises: deleting at least one field from at message (0036).

Response to Arguments

2. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/085,608

Art Unit: 2662

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saba Tsegaye whose telephone number is (571) 272-3091. The examiner can normally be reached on Monday-Friday (7:30-5:00), First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on (571) 272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
